	® EB	

Application

ÖLFLEX® EB cables are PVC control cables with blue outer sheath for occasional flexible use and fixed installation in intrinsically safe circuits. They are also suitable for use in dry, damp or wet areas. They are suitable for outdoor use if the indicated temperature range is observed.

ÖLFLEX® EB cables are suitable for occasional, non-automated movements. The maximum tensile load is 15 N/mm² of conductor cross-section during installation and operation. Compulsory guidance is not permitted.

Application range:

Installation of intrinsically safe circuits, where a special cable marking for hazard area type “i” – intrinsic safety is specified; The cables meet the requirements of DIN EN 60079-14(VDE 0165-1), section 16.2.2 potentially explosive atmosphere.
