	ÖLFLEX® CLASSIC 100 300/500V	

Application

ÖLFLEX® CLASSIC 100 300/500V cables are colour coded control cables for occasional flexible use and fixed installation for medium mechanical use. They are suitable for use in dry, damp and wet areas and are space-saving due to smaller cable diameters. If using outdoors, observe the indicated temperature range and use with UV protection. They are largely resistant to acids, alkalis and certain oils at room temperature.

ÖLFLEX® CLASSIC 100 300/500V cables are suitable for occasional, non-automated movements. They meet the requirements for slow rotational movements, such as in the loop of a wind turbine. The maximum tensile load is 15 N/mm² of conductor cross-section during installation and operation. Compulsory guidance is not permitted.

Application range: ÖLFLEX® CLASSIC 100 300/500V cables are used as control cable in industrial machinery, plant engineering, in power stations, in heating and air-conditioning systems, etc.

This cable is suitable for torsion application in wind turbines (WTG). The torsional load is limited to applications, as they typically occur in the loop of a wind turbine.
